EDUCATION

Techno India University — Kolkata , West Bengal

Bachelor of Technology (B.Tech) in Computer Science Engineering , CGPA : 9 — **August,2024 – September,2028**

Sarada Vidyapith(H.S) — Sonarpur, West Bengal

Higher Secondary Examination (Class XII) , Percentage : 91% — **2024**

Secondary Examination (Class X) , Percentage : 95.57% — **2022**

SKILLS SUMMARY

- **Languages** : C , C++ , Python , Java , SQL, JavaScript , HTML, CSS, TypeScript
- **Frameworks:** NumPy, Pandas, Matplotlib, Scikit-learn, React.js, Next.js
- **Tools:** Git, GitHub , Figma, Canva, Powerpoint, Word, Microsoft SQL, MySQL, Clerk
- **Platforms:** Vercel, VS Code, Jupyter Notebook, Linux, Antigravity
- **Soft Skills:** Leadership, Team Collaboration, Project Management, Communication, Problem Solving, Presentation

WORK EXPERIENCE

Google Gemini Student Ambassador 2026

GID: 10668 | 2026 – Present

- Led campus-level Google Gemini awareness and student engagement initiatives, promoting practical applications of generative AI among students.
- Organized and hosted the Product Trial — “Build Night with Nano Banana” via Google Meet, facilitating hands-on AI experimentation and creative ideation.
- Managed the complete event workflow, including pre-survey, registrations, Google Meet coordination, feedback collection, participant follow-ups, and certificate coordination.
- Executed the “Fund My Crazy” initiative, engaging students in transforming innovative ideas into practical technology and startup concepts.
- Created AI-focused reels, campaigns, and visual content, including “Startup in 5 Minutes” and ShareSpace, using Gemini and Nano Banana.
- Prepared Monthly Highlights documenting ambassador activities, campaigns, content creation, and student engagement.
- Coordinated student communication through WhatsApp communities, announcements, surveys, feedback forms, and post-event support, strengthening campus participation in Google AI initiatives.

Unstop Campus Champion | Unstop

2026 – Present

- Promoting Unstop competitions, internships, challenges, and career opportunities across campus.
- Driving student registrations and participation through campus communities and social media.
- Creating promotional content and coordinating announcements, deadlines, and event information.

- Engaging with students to increase awareness and participation in Unstop opportunities.

PROJECTS

AI Background Removal SaaS Application | https://bg-removal-web.vercel.app/
React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Clerk, AI API

- Developed and deployed a full-stack AI-powered SaaS application that enables users to upload images, automatically remove backgrounds using AI, and download transparent-background images.
- Implemented secure user authentication and profile management using **Clerk**, integrating ready-to-use login, registration, and user-management components.
- Built a responsive frontend with **React.js and Tailwind CSS** and developed backend services using **Node.js, Express.js, and MongoDB** for application and user data management.
- Integrated AI-based image processing to deliver automated background removal through an intuitive web interface.

Weather Forecast Web App | https://weather-app-sable-nine-93.vercel.app/
HTML, CSS, JavaScript, OpenWeatherMap API

- Developed a responsive weather application that fetches and displays real-time weather data based on user-selected cities.
- Integrated the **OpenWeatherMap API** using JavaScript to display temperature, weather conditions, humidity, and wind speed.
- Implemented city search functionality with a clean, user-friendly interface for quick weather lookup.

Shubho Sharodiya | Interactive Durga Puja Web Application | https://shubho-sharodiya.vercel.app/
Next.js, TypeScript, Tailwind CSS, Leaflet.js, Vercel

- Developed a **responsive cultural web application** with Dark/Light mode, interactive UI, and mobile-first design.
- Integrated **Leaflet.js** to build an interactive pandal map with custom markers and location-based navigation.
- Implemented a **real-time Pujo countdown timer**, interactive audio player, and **Pujo Hopper Challenge** for user engagement.
- Built a **Festive Wish Card Generator** with dynamic content customization and integrated **GitHub-based CI/CD deployment via Vercel**.

Personal Portfolio Website | https://joysamul.github.io/Portfolio/
HTML5, CSS3, JavaScript, GitHub

- Designed and developed a **responsive portfolio website** to showcase projects, certifications, technical skills, and academic background.
- Implemented **Dark/Light mode, interactive project galleries, repository links, and dynamic UI components** using JavaScript.
- Developed a **functional contact form** with integrated professional and social links for streamlined communication.
- Configured **GitHub Pages deployment** with version-controlled source code and automated static hosting.

Solar-Powered Smart E-Dustbin

- Designed and developed a solar-powered smart dustbin integrating an Arduino microcontroller, ultrasonic sensor, servo motor, rechargeable battery, and photovoltaic panel.
- Automated lid opening through proximity sensing and implemented waste-level monitoring with LED/Buzzer notifications for full-bin alerts.
- Built an energy-efficient embedded system utilizing renewable energy to support sustainable waste management.
- Applied concepts of embedded systems, sensor integration, automation, and power management to solve a real-world environmental problem.

Spam Message Classifier Using Machine Learning

Python, Pandas, NumPy, Scikit-learn, Matplotlib

- Developed a supervised machine learning model to classify emails as Spam or Ham using Logistic Regression and Decision Tree algorithms.
- Performed data preprocessing, text cleaning, tokenization, TF-IDF vectorization, and feature engineering to improve model performance.
- Evaluated model performance using Confusion Matrix, ROC Curve (AUC), accuracy, precision, recall, and F1-score.
- Visualized the Decision Tree for model interpretability and compared classification performance across algorithms.

CERTIFICATES

- **Google AI & Machine Learning Virtual Program — 9 Skill Badges |** **December 2025**
  AI, Machine Learning, Generative AI, Data Analysis
- **AWS Data Engineering Virtual Internship |** **March 2026**
  AWS, Data Engineering, ETL, Data Pipelines, Cloud Computing
- **EduSkills Ethical Hacking Virtual Internship |** **June 2026**
  Ethical Hacking, Cybersecurity, Network Security, Vulnerability Assessment
- **EduSkills Data Analytics with Python & Power BI |** **August 2026**
  Python, Data Analysis, Data Visualization, Power BI, Business Intelligence
- **EduSkills SQL & Database Management Systems |** **September 2026**
  SQL, DBMS, Database Design, Query Optimization
- **Programming for Everybody: Getting Started with Python — University of Michigan |** **September 2026**
  Python, Programming Fundamentals, Data Structures, Problem Solving
- **Object-Oriented Programming with C++ — Microsoft |** **September 2026**
  C++, OOP, Classes & Objects, Inheritance, Polymorphism
- **Introduction to Front-End Development — Meta |** **September 2026**
  HTML5, CSS3, JavaScript, Responsive Web Design, Front-End Development
- **Programming in Python — Meta |** **September 2026**
  Python, Programming Fundamentals, Functions, Data Structures, Problem Solving
